

August 3, 2017

This letter is prepared to show the support from the IEEE RAS TC 1 “Aerial Robotics and Unmanned Aerial Vehicles” to the Workshop entitled “**Towards Whole-Body Aerial Loco-Manipulation**” to be proposed to the Humanoids 2017 conference by Matteo Fumagalli (Aalborg University of Copenhagen), Dr. Daniele Pucci (IIT, Italy), Dr. Arash Ajoudani (IIT, Italy) and Dr. Jaeheung Park (Seoul National University, Korea)

As TC Co-Chair for IEEE RAS TC 1, I endorse this proposal given that one of the driving forces behind the objectives of the Workshop is aerial manipulation.

If you have any questions about this endorsement letter, please do not hesitate to contact me at [aollero@us.es](mailto:aollero@us.es)

Sincerely,

Aníbal Ollero Baturone

Full Professor at the University of Seville and Head of the GRVC.

Scientific Advisor of the Center for Advanced Aerospace Technologies ( FADA-CATEC

Co-chair of the IEEE Technical Committee on Aerial Robotics and Unmanned Aerial Systems.
